

Faculty Insight Assists in the Research Development of Scholars

Relieve faculty from the burden of entering scholarship data and help them uncover collaborators, funding, and award opportunities.

Current Challenges

- Faculty members want ways to easily secure funding and identify collaborators on campus and across the nation.
- Keeping faculty profiles up to date with scholarly expertise and experience is difficult and administrative efforts to do so are inconsistent. Lack of a centralized, updated database makes it difficult to identify subject matter experts and assemble collaborative research teams.
- Scholars who are skeptical of external data sources can see the works ascribed to them and verify their accuracy.

- **Enables faculty members to identify collaborators** by querying user-determined research themes and topics. Faculty members can identify collaborators on campus and throughout the nation, across disciplines, departments, and programs.
- **Empowers faculty users to uncover relevant funding and honorific award opportunities.** Faculty insight displays relevant public and private funding as well as national and international honorific award opportunities. Opportunities are suggested based on a faculty member's expertise and research interests. Data on funding opportunities are updated daily.

Faculty Insight Solutions

Faculty Insight, a module of the Discovery Suite of tools:

- **Provides faculty members a pre-populated profile page and editing tool.** The profile contains a faculty member's scholarly activity (articles, grants, books, awards, patents, etc.) as well as funding and honorific award opportunities based on keywords and themes empirically derived from profiles, similar scholars, and collaborative network views. Data can easily be integrated with university-housed data to further augment the profiles. Scholars can verify, update, edit, and curate information about their own scholarly activity.

All information is presented in an intuitive interface.

- **Saved search** - users can access searches from previous sessions.
- **Advanced search** - users can type in complex Boolean search strings.
- **Proxy editing** - users can designate staff who are allowed to access and edit their profiles.
- **Non-faculty access** - non-faculty users can set up research interests, receive push notifications, and save funding and honorific award opportunities.

Learn more about Faculty Insight
Contact Academic Analytics at info@academicanalytics.com

Faculty Insight gives scholars a pre-populated faculty activity page and a profile editing tool to add additional scholarly work.

Faculty Insight provides continuously updated targeted research funding and honorific award opportunities and an integrated search tool to find collaborators.

Faculty Insight Activity Reporting

A simple, yet robust time-saver for faculty and administrators

Faculty Insight Activity Reporting improves faculty members' efficiency and helps them to achieve their research goals, while providing administrators with an integrated, intuitive platform.

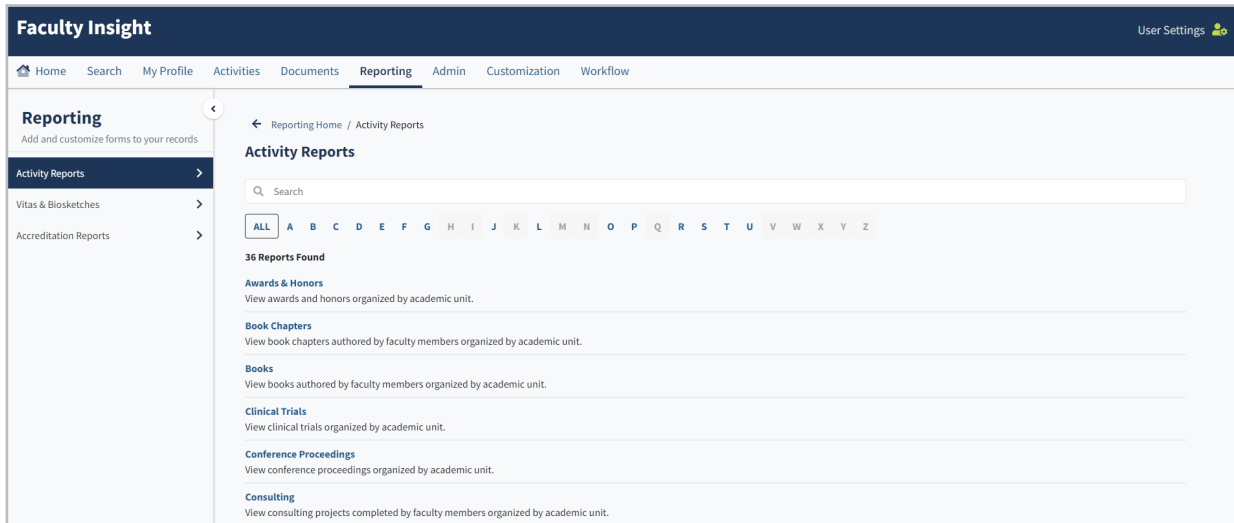

Current Faculty and Administration Challenges

- Faculty members don't have time to enter their scholarship data
- Data are complicated to gather and curate
- Faculty want to control what activities are shown in their profiles
- Creating reports on scholarly works, teaching and service activities take substantial time and effort

Faculty Insight Activity Reporting Solutions

- **Automation:** Pre-populated faculty data feeds Activity Reporting
- **Integration:** Merge university sourced data feeds
- **Customization:** Create custom activities to capture complete scholarship
- **Accreditation:** Reports for AACSB, ABET, CAEP, and SACSCOC
- **Vitas:** Faculty can generate a University Vita, Annual Report or build a custom Vita

Robust and flexible reporting allows administrators easy access to faculty activity data

Faculty Insight Reviews & Workflows

The Reviews & Workflows tool automates and streamlines processes, while providing administrators with a simple yet robust solution for conducting reviews.

Current Faculty and Administration Challenges

- Complex review and workflow systems with various colleges and departments having different processes and needs.
- Significant workload during review cycles
- Current systems result in inefficient use of time and management
- Reviews and workflows are complex to process

Faculty Insight Reviews & Workflows Solutions

- **Automation:** Data is transferred from Faculty Insight Activity Reporting directly into Reviews & Workflows
- **Configuration:** Administrators can set dates, assign reviewers, manage recusals, share portfolios, and monitor workflow status.
- **Integration:** Data from other systems can be imported into Faculty Insight for reviews and workflows.
- **Configuration:** Personalize Reviews & Workflows and monitor their progress

Build robust, flexible, and efficient workflow systems to facilitate multiple types of review workflows, including promotion and tenure, annual reviews, hiring, sabbatical decisions and more.

The screenshot illustrates the Faculty Insight Workflow configuration and monitoring interface. It is divided into three numbered sections:

- Workflow Configuration:** Shows a visual flowchart of a review process. The steps are:
 - Faculty Self-Assessment (Faculty Level Step):** Includes a 'Self-Evaluation form'.
 - Department Chair Review (Department Level Step):** No forms or documents.
 - College Review (College Level Step):** No forms or documents.
 - Faculty Feedback (Faculty Level Step):** No forms or documents.
 The flow is: Faculty Self-Assessment → Department Chair Review → College Review → Faculty Feedback.
- Create Workflow Form:** A form for creating a new workflow.
 - Workflow Type:** Expertise
 - Review Workflow Template:** MULTI-DEPARTMENT WORKFLOW
 - Workflow Name/Title:** MULTI DEPT
 - Candidates:** Select Faculty (3 Selected Faculty)
 - Workflow Start Date:** 05/15/2023
 - Follow these 5 easy steps:**
 - Select Review Workflow Template
 - Name Review Workflow
 - Select Candidates with Faculty Picker
 - Set start date for first review step of new workflow
 - Review, confirm and create
- Workflow Monitoring Dashboard:** A table showing the status of review steps for a 'MULTI-DEPARTMENT' workflow.

Name	Operator	Start Date	End Date	Candidate Reviews	Status	Action
First Step	Cell Biology and Anatomy	April 26, 2023	May 5, 2023	0 / 1	In Progress	
First Step	Ecology and Evolutionary Biology	April 26, 2023	May 5, 2023	0 / 1	In Progress	
First Step	Spanish and Portuguese	April 26, 2023	May 5, 2023	0 / 1	In Progress	
First Step	Global and International Studies	April 26, 2023	May 5, 2023	0 / 1	In Progress	
First Step	Molecular/Biosciences	April 26, 2023	May 5, 2023	0 / 1	In Progress	

A simple, but highly customizable system that automates the entire review process
