Artificial Intelligence Research Project - The Academic Analytics analyst team worked collaboratively with Olof Westerstahl and Gloria Griessman to create an analysis of Artificial Intelligence research at Georgia Tech. Olof has used the results to find faculty that might be doing AI research on campus that were previously unknown, and has compared the AI metrics at Georgia Tech to the AI metrics at other institutions to understand how Georgia Tech fit into the larger Artificial Intelligence landscape.
8 months, 107 analyst hours, 4 reports

Academic Analytics Report for Georgia Tech - Ivan Allen College of Liberal Arts – This report, originally created for the chairperson in Oct 2018 was updated for the next two database releases.
9.3 analyst hours, 2 reports

GEORGIA TECH USAGE APPLICATIONS

By renewing at the MLA level, you can continue accessing comparative data on Georgia Tech and national scholars, custom reporting, and downloads; plus enjoy our discovery tools, which include existing and suggested collaborations, team builder, suggested funding, and suggested honorific awards.

Adding Faculty Insight and the External Discovery Suite provides faculty access to our discovery tools with the ability to add data, control visibility settings, opt into push notifications, and more!

We value our partnership and appreciate your business
